Peripheral denervation of the bladder, endoscopic biopsy in the diagnosis of, 455
Peyronie's disease, non-surgical treatment of, 392
Phimosis in boys, 147
Pituitary ablation in the relief of pain in advanced prostatic carcinoma, 301
Polyps, benign fibrous ureteric, diagnosis and management, 253
Primary carcinoma *in situ* of renal pelvis and ureter, 401
Prostaglandin, E_2, intravesical, clinical experience with. Prospective study of 36 patients, 357
  intravesical: release and effect of bladder instillation on some micturition parameters, 351
  supersensitivity to, in chronic neurogenic bladders, 290
Prostate, carcinoma of, bone metastases from, studied by strontium-87m and the gamma camera. A review after 6 years, 69
  carcinoma of, with widespread metastatic bone disease, palliative effect of cyproterone acetate, 402
  embryonal rhabdomyosarcoma of, five-year survival following cystoprostatectomy, 323
Prostatectomy, and the unstable bladder, 529
  prevention of secondary haemorrhage after: the value of antifibrinolytic therapy, 26
  transurethral, fluid absorption during, 526
  treatment of patients with urinary incontinence after, 532
Prostatic cancer, diagnosis of oestrogen escape and the role of secondary orchiectomy in, 535
  estramustine phosphate in the treatment of advanced, 29
  non-hormone chemotherapy of, 127
  parenteral cyproterone acetate in the treatment of advanced: a phase III randomised trial, 208
  carcinoma, advanced, pituitary ablation in the relief of pain, 301
  fluid, macrophages in, 381
  hyperplasia, benign, pathological anatomy of digital enucleation and its application to endoscopic resection, 111
  hypertrophy, benign, evaluation of the role of injection therapy, 204
    total and SHBH-bound testosterone and 5α-dihydrotestosterone serum concentrations in normal elderly men and patients with, before and after removal of the adenoma, 377
Prostheses, penile, for the treatment of impotence, 575
Pseudotumour of the bladder associated with outflow obstruction, 326
Pubic ectopic testicle, 164
Pyelonephritis, xanthogranulomatous, cause of renojejunal fistula, 66
Pyeloplasty, significance of urine leak after, 187
Pyramidal disease, minimal, and urinary incontinence, 460

Quadriplegia, urological disability in: study of treatment and follow-up in 92 patients, 488

Rectal bladder, pre-operative and post-operative evaluation of, 285
Reflux, ureterodiverticular, and yo-yo effect: ureteric diverticula. Television study with spot filming, 345
  vesicoureteric, paraureteric diverticula and duplication of the pelvicaliceal collecting system, interrelationship between: a family study, 269
Renal, *See also* Intrarenal, Kidney(s)
  carcinoma in a child simulating post-traumatic haematoma, 65
  in a female child, long survival after, 64
  vaginal metastasis of, without renal vein involvement, 327
  cyst, parapelvic. Report of 8 cases with particular emphasis on diagnosis and management, 342
  failure, chronic, nephrolithotomy in: saved from dialysis!, 419
  function, advantages of ^{99m}Tc DTPA(Sn) in dynamic renal scintigraphy and measurement of, 174
  and morphology, effects of intrarenal access on, 409
  pelvis, compensated obstruction of, 79
  and ureter, primary carcinoma *in situ*, 401
  scintigraphy, dynamic, advantages of ^{99m}Tc DTPA(Sn) in measurement of renal function, 174
  trauma, blunt, conservative approach to management. Results of a follow-up study, 338
  tumours in childhood, study using xenogeneic antiserum, 245
Renojejunal fistula caused by xanthogranulomatous pyelonephritis, 66
Report, of standing committee on urological instruments: solid state diathermy generators, 169
  (third) on standardisation of terminology of lower urinary tract function, 348
Retention, acute, comparison between continuous flow and intermittent flow transurethral resection in 40 patients, 523
  identification of patients at risk from, 520
Retroperitoneal fibrosis. Practical problems in management, 443
Retrovesical liposarcoma, 163
Reversal vasectomy, factors influencing the outcome, 57
Rhabdomyosarcoma, embryonal, of prostate, five-year survival following cystoprostatectomy, 323
Rupture of the urinary bladder in children. The importance of the double lesion, 15

Sampling methods, urinary, their relevance in patients with indwelling Foley catheters, 92
Scanning electron microscopy in the study of normal, inflamed and neoplastic human urothelium, 370
Scaphoid megalourethra: report of 2 cases, 143
Scintigraphy, dynamic renal, advantages of ^{99m}Tc DTPA(Sn) in measurement of renal function, 174
Seminal tract, transurethral drainage of, for obstruction, infection and infertility, 220
Serum, hormone levels in patients with malignant testicular germ cell tumours without clinical and/or radiological signs of tumour, 151
  sperm-agglutinating antibodies, significance of, in men with infertile marriages, 566
Solitary kidneys, hypothermic nephrolithotomy in, 415
Spectrometry, drop, its measurement of the variability of normal male voiding patterns, 196
Spinal cord injury in man, penile erection following, 216
Staging bladder tumours, computed tomography as adjunct to bimanual examination, 101
Standardisation of terminology of lower urinary tract function, third report, 348
Stethoscope, Doppler, in the diagnosis of subclinical varicocele, 390
Stone(s), surgery, nephroscopy in, 333
  ureteric, treatment of. Report on 1120 patients, 436
  urinary, investigations using autoradiographic analysis, 243
  vesical, and hypokalaemic hyperchloraemic metabolic acidosis complicating appendicovesical fistulae, 274

Strictures, urethral, at Baragwanath Hospital, 386
Strontium-87m and the gamma camera in the study of bone metastases from carcinoma of the prostate. A review after 6 years, 69
Subfertile and fertile men, Doppler flow studies, venography and thermography in the evaluation of varicoceles of, 560
Supersensitivity, urethral, and occult urethral neuropathy, 131

Teratomas of testis, role of surgery in the combined management of metastases from, 38
Testicle, pubic ectopic, 164
Testicular, cancer, disseminated, management of, 45
tumours, metastatic, chemotherapy of, 34
Testis, bilateral germ cell tumours, 158
teratomas, malignant, role of surgery in the combined management of metastases from, 38
Testosterone, total and SHBH-bound, and 5α-dihydrotestosterone serum concentrations in normal elderly men and patients with benign prostatic hypertrophy before and after removal of the adenoma, 377
Thermography, venography and Doppler flow studies in the evaluation of varicoceles of fertile and subfertile men, 560
Thioglycolic acid, its use in hair-bearing skin inlay urethroplasty, 546
TNM (1978) in bladder cancer: use and abuse, 500
Tomography, computed, as adjunct to bimanual examination for staging bladder tumours, 101
Transection, bladder, for urge incontinence associated with detrusor instability, 480
denervation of the urinary bladder. An experimental study, 193
Transitional cell carcinoma cases, survival in 2 Yorkshire centres, 497
Transurethral, drainage of the seminal tract for obstruction, infection and infertility, 220
prostatectomy, fluid absorption during, 526
resection, comparison between continuous flow and intermittent flow, in 40 patients presenting with acute retention, 523
method of post-operative irrigation, 231
ureterolithotomy, 439
Trauma, blunt renal, conservative approach to management. Results of a follow-up study, 338
ureteric, by catheterisation of tuberculous bladders, 325
Tuberculous bladders, ureteric trauma by catheterisation of, 325
Tumours, bilateral germ cell, of testis, 158
bladder, computed tomography as adjunct to bimanual examination for staging, 101
malignant testicular germ cell, serum hormone levels in patients without clinical and/or radiological signs of tumours, 151
metastatic testicular, chemotherapy, 34
renal, in childhood, study using xenogeneic antiserum, 245

Ureter, and kidney, urothelial carcinoma of, 430
and renal pelvis, primary carcinoma *in situ*, 401
leiomyoma of, with ureterocele, 400
Ureteric diverticula: ureterodiverticular reflux and yo-yo effect. Television study with spot filming, 345
ectopy in children, 257
splint, percutaneous, internal urinary diversion by, 165
stones, treatment of. Report on 1120 patients, 436
trauma by catheterisation of tuberculous bladders, 325
Ureterocele with leiomyoma of ureter, 400
Ureterodiverticular reflux and yo-yo effect: ureteric diverticula. Television study with spot filming, 345
Ureterolithotomy, transurethral, 439
Ureteropathy, bilharzial, evaluation for surgery, 446
Ureterosigmoidostomy, osteomalacia in, healing by correction of the acidosis, 61
Urethra, female, primary carcinoma of, 549
Urethral, diverticulum in females, 305
incompetence, detection in women using the fluid-bridge test, 138
sensation, its role in clinical urology, 539
strictures at Baragwanath Hospital, 386
supersensitivity and occult urethral neuropathy, 131
Urethroplasty, use of thioglycolic acid in hair-bearing skin inlay, 546
Urethrotomy, Otis, evaluation in female patients with recurrent urinary tract infections. A review after 6 years, 68
visual internal, 542
Urge incontinence associated with detrusor instability, bladder transection for, 480
Urgency and frequency of micturition, management of, 367
Urinary, ascites in the newborn, 451
bladder, in children, rupture of. The importance of the double lesion, 15
malignant phaeochromocytoma of, 230
transection denervation of. An experimental study, 193
diversion, ileal conduit: long-term follow-up in adults, 515
internal, by percutaneous ureteric splint, 165
incontinence, after prostatectomy, treatment of patients, 532
and minimal pyramidal disease, 460
stones, investigations using autoradiographic analysis, 243
tract function, lower. Third report on the standardisation of terminology of, 348
infections, recurrent. An evaluation of Otis urethrotomy in female patients. A review after 6 years, 68
urea-splitting infections, hydroxyurea in management of, 316
Urine leak, its significance after pyeloplasty, 187
Urolithiasis, xanthine, failure of dissolution by local lavage, 322
Urological, carcinoma and carcinoembryonic antigen. A review after 7 years, 166
disability in quadriplegia: study of treatment and follow-up in 92 patients, 488
instruments, report of standing committee: solid state diathermy generators, 169
Urothelial, carcinoma of the kidney and ureter, 430
cell separation *in vivo*, experimental trypsin-induced, 295

Vaginal metastasis of renal carcinoma without renal vein involvement, 327
Varicocele(s), Doppler assessment of, and internal spermatic vein reflux in infertile men, 50
of fertile and subfertile men, Doppler flow studies, venography and thermography in the evaluation of, 560
subclinical, Doppler stethoscope in the diagnosis of, 390
Vasectomy reversal, factors influencing the outcome, 57
Venography, thermography and Doppler flow studies in the evaluation of varicoceles of fertile and subfertile men, 560

Vesical leukoplakia, 96
stone and hypokalaemic hyperchloraemic metabolic acidosis complicating appendicovesical fistulae, 274
Vesicoureteric reflux, paraureteric diverticula and duplication of the pelvicaliceal collecting system, interrelationship between: a family study, 269
Voiding cystometrogram, drug effects on: a comparison of oral bethanecol and carbachol, 484
patterns, male, their variability measured by drop spectrometry, 196

Xanthine urolithiasis, failure of dissolution by local lavage, 322
Xanthogranulomatous pyelonephritis, cause of renojejunal fistula, 66

Yo-yo effect and ureterodiverticular reflux: ureteric diverticula. Television study with spot filming, 345
